VERSAFLOW FLOW METERS
Accurate and Reliable Measurements for the Most Demanding Applications
Honeywell VersaFlow Solutions

As part of Honeywell’s broad lineup of field instruments, VersaFlow flowmeters are built to our exacting standards for quality, performance and reliability backed up by a comprehensive global support network.

VersaFlow Electromagnetic Flowmeter

VersaFlow Electromagnetic Flowmeter is suitable for a variety of measuring tasks and applications, including rapidly changing media, pH jumps, large amounts of solids or pulsating flow. Product versatility enables VersaFlow Magmeters to deliver significant cost savings during planning, procurement, installation and training. Virtual reference grounding eliminates the need for grounding electrodes or rings, reducing installation costs and potential leak points.

Benefits
- Proven technology
- Expanded application capabilities
- A wide range of process conditions
- Easy to install and operate
- Sizes to fit your application requirements
- Chemically resistant to acids and alkalis

Features
- Conductivity down to 1 µS/cm
- Virtual reference ground
- Conductivity and electrode resistance measurement
- Easy to select and maintain
- Empty pipe detection
- Electrode noise detection
- Modular electronics concept

Applications
- Suitable for all conductive applications
- From clean liquids to slurries and pastes with high solids content
- Abrasion, chemical and vacuum resistant
- Suitable for high temperatures
- Energy measurement in commercial buildings

VersaFlow Clamp-on Ultrasonic Flowmeter

VersaFlow Clamp-on Ultrasonic Flowmeter stands for continuity and long-term reliability. Flow measurement can be done anywhere and startup is immediate. The clamp-on flowmeter with its robust industrial construction and regreasing concept provides a revolutionary solution for easy handling and reduced maintenance costs.

Benefits
- Reduced installed cost
- Low cost to service and maintain
- No flow interruptions and no downtime
- No pressure loss, no wear and no clogging

Features
- Non intrusive
- Easy sensor mounting
- Optimized reliability
- Easy installation wizard
- Minimal maintenance
- Flexible

Applications
- Chemical addition
- Potable water
- Purified water
- Broad range of refined hydrocarbons
- Sanitary flow rate measurements
- Deionized and demineralized water
VersaFlow Coriolis Mass Flowmeter

VersaFlow Coriolis Mass Flowmeter measures mass flow, density, volume, temperature, mass or volume concentration and solids content with a single device. It is a high performance meter designed to meet the requirements of liquids and gas applications with wide operating temperature and Pressure ranges. VersaFlow Coriolis devices are available in straight and bent tube designs with straight measuring tube in Hastelloy, titanium or Stainless steel MOC. It offers a high level of performance together with wide operating temperature and pressure ranges.

Benefits
- Direct mass and density measurement
- Highly accurate and low pressure drop
- Near zero flow rate
- Flow conditioning usually not required
- Reduced maintenance time and cost
- Designed for liquid as well as gas applications.
- Two phase flow indication & diagnostics acc to NAMUR 107

Features
- Straight and bent tube designs
- Secondary pressure containment around sensor
- Extended temperature & pressure ranges
- Easily drained and easy to clean
- Excellent zero stability
- Stable measurement even with 100% gas entrainment
- Immunity to crosstalk
- Compact envelope

Applications
- Liquids or Gases
- Slurries or Viscous products
- Liquids with gas entrainment
- Custody transfer
- Abrasive fluids
- Density, temperature and concentration measurement
A Versatile Flowmeter Solution

Honeywell VersaFlow flowmeters provide accurate and reliable measurements for demanding applications in the following industries:
