GO BEYOND METERING, OPTIMIZE WITH PRECISION!

With the acquisition of Elster by Honeywell, new worlds of possibilities are opening up for the metering solutions that Honeywell is now offering under the name Elster Precision Solutions.

As Honeywell Process Solutions is a pioneer in automation control, instrumentation and services for the oil and gas, refining and industrial power generation industries to name but a few, the deep domain knowledge of both automation and metering now come together. These added capabilities enable us to address the growing importance of data availability and mobility that we are observing in the industry.

We are very pleased to be able to offer enhanced data solutions combined with precise, accurate metering and control systems, and we are convinced that this will offer great benefits to our customers in the oil and gas industry!

With the acquisition of Elster, various complementary product lines are now available from a single source: field instrumentation, high pressure regulators, odorization equipment, PLCs, SCADA and DCS solutions. The result is an extensive product portfolio backed by a global service and support organization.

In our project business for metering and control solutions, the benefits of this new combination of technologies really become tangible and to underline this new direction and these new possibilities, we have renamed the skids and stations business “Elster Precision Solutions”.

With Honeywell Elster Precision Solutions, we provide total metering solutions for gas and liquids for the oil and gas industry. We offer end-to-end project management all over the world that includes all steps from concept engineering and construction to commissioning and lifecycle services. By enabling full and easy access to all available data, we go beyond metering in ensuring the highest level of safety, efficiency and precision.

With Elster Precision Solutions, Honeywell is a global player which offers total metering and control packages. Our solutions are used in a wide range of industries and applications. From combined gas and liquids metering systems in the off-shore industry in the Pacific Ocean to LNG terminals in the US, city gate stations in China and a biomethane grid injection system on a farm in France, Honeywell offers fully compliant and turnkey solutions.

Today’s industry not only asks for effective solutions but also for efficient ways of executing projects. With Honeywell’s extensive experience in project execution and Elster’s deep domain knowledge on metering solutions this is exactly what Elster Precision Solutions has to offer.
