Digital Suites for Oil and Gas

Discover performance through digital intelligence

State of the Industry
Overcoming key challenges facing Oil and Gas producers today:

- More profit on each barrel: Faster, safer:
  - Maximizing ROI on existing assets
  - Improving production performance while maintaining safety
  - Reducing operating costs

Benefits of Effective Production Management
The value of integrated operations in upstream Oil and Gas include:

- Decline in operating costs: 10-20%
- Reduction in OPEX: 20%
- Increase in production efficiency: 5%
- Typical savings, per well, from better monitoring: $200K–300K
- Increase in operator productivity: 100–400%

The Honeywell Solution
Honeywell offers digital field technology through Digital Suites for Oil and Gas, which can help improve production performance through digital intelligence.

- 6 Suites in the Digital Suites for Oil and Gas:
  - Operational data
  - Process safety
  - Equipment effectiveness
  - Operational performance
  - Production surveillance
  - Production excellence

- Expected production increase from using Honeywell’s Digital Suites for Oil and Gas: 3–5%
- 50 sites on the North Sea and another 100 sites worldwide are using Honeywell software solutions
- Typical annual savings in a mid-size field: $5 MILLION USD
