Lidec L20D
Application: oil and fuel tanks - high or low level

The Lidec L20D is based on the propagation of a surface wave. This design does not include any moving part. The reliability of the device is ensured by a built-in function which monitors electronic or transducer failures. The Lidec L20D designed to be installed horizontally (or vertically), can be used for all types of liquids. Also, it requires no calibration as not influenced by type of fluid.
L20D - Technical Specifications

**Special Features**

- Current output according to model:
  - **L20D-H:** in liquid: 6 mA
    outside liquid: 18 mA
  - **L20D-L:** in liquid: 18 mA
    outside liquid: 6 mA

- Horizontal or vertical mounting
- Fully static device
- Fail-safe operation
- Insensitive to vibrations, shocks, electrical disturbances and solid cargo product
- Insensitive to pressure and temperature
- Approved by major classification societies
