

ControlEdge™ RTU Process Controller

Your edge for improved management of distributed assets

Differentiators

Reduce equipment monitoring and diagnostic time from hours to minutes

Improved vision to the production potential of your distributed assets

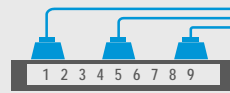

Integration with Experion® SCADA reduces configuration time 80%

Features

Redundant Controller and Expansion I/O

- Adds availability
- Extends I/O capacity
- Meets multi-well needs in Oil and Gas fields

Electronic Flow Metering

- API 21.1 & 21.2 Compliance
- Validated against AER Directive 17 Compliance

Benefits

Built-in Wireless and HART enabled I/O

Low power consumption

Designed for Harsh Environments

Reduced travel to the field

Efficient wiring with removable terminals

Integrated field device management

Typical 1.9

-40 to 75°C
