SupportLite TotalCare Program for Terminals

Service Note

Honeywell’s service contracts for terminals control your maintenance costs while boosting the reliability and performance of the terminal operation. We help solve your key business issues around accuracy, compliance, skilled labor and asset availability. We’ll help keep your equipment running longer and performing better. And when problems arise, we’ll help you resolve them faster.

SupportLite TotalCare is the essential maintenance package covering your key terminal systems, devices and software:

- Enraf tank gauging
- Batch controllers
- Entis, EntisPro and CIU software, as well as gauge firmware
- Other field instruments, including level and temperature transmitters.

A single, simple contract that gives users access to remote support from our local telephone helpdesks or our Global Technical Assistance Center (GTAC) for the troubleshooting. Users get a standard number of service requests (SRs) a year included, depending on asset size and detailed in the service contract.

Honeywell’s experienced technical support staff will aim to address problems before an engineer arrives – in many cases even eliminating the need for a site visit. With a secure connection to your equipment, our experts work rapidly to diagnose, troubleshoot and resolve problems remotely.

FEATURES & BENEFITS

Reduce delays and downtime
- Remote support through our secure connection
- Faster response times
- Quicker resolution of issues to maximize availability
- Reduce delays waiting for engineering site visits

Control costs
- A single annual payment
- A standard number of service requests included in contract based on the asset size
- Eliminate unnecessary site visits
- Cut the risks of compliance issues and abnormal incidents

Address skills shortages
- Reduce dependence on onsite maintenance teams
- Honeywell’s technical experts and experienced support staff on call
- Easy access to services for troubleshooting

Simplify maintenance services
- A single contract for your tank gauges, batch controllers, field instruments and terminal software

A trusted partner
- Decades of experience serving terminals
- A leader in terminal automation, gauging and control technology
- Technical expertise and deep domain knowledge
Services are available during the working week during business hours as detailed within the contract, and requests are assigned a ticket number for easy reference. All support requests are handled by Honeywell’s experienced technical specialists.

**Honeywell Terminals Service Contracts**

We provide services and maintenance offerings to suit every business. From telephone support to outcome-based packages, we help business control costs, address skills gaps, ensure compliance and maximize performance. Our expert services are delivered with highest standards of customer care.

Providing cost certainty and unmatched quality, we help businesses manage the risks to their equipment and solutions over the whole lifecycle. Flexibility to deliver a level of service to meet each business’s specific needs means we can tailor a package to suit you.

Our service contracts help operators ensure accurate, reliable measurements across operations to protect profits; control maintenance costs; eliminate downtime; maximize availability; and avoid incidents that can compromise compliance or safety on site.

Talk to us today about how we help you build a more effective maintenance and service program for your terminal.
