

Supporting your Series C Needs

Honeywell's Certified Recycled Parts (CRP) program offers more than field replaceable spares for aging legacy hardware. They can now support your Series C needs as well.

Service Note

While the Honeywell CRP program is aimed at optimizing user's investments in Honeywell systems by extending the life of aging hardware while enabling transition to current supported systems, supporting legacy hardware is not all it does. The CRP program can help you support your current systems as well.

Series C Modules

The Honeywell flagship controller family based on the C300 and the Series C modules have been installed in the field for over a decade now and the modules to support the system can be found within the Honeywell Certified recycled Parts program. A variety of IOPs and IOTAs may be available at any time to meet your spare parts support needs to help you maintain your system uptime. Check with the CRP team on availability of the modules you need at CertifiedRecycledParts@Honeywell.com

Need a Module in a Short Timeline?

If you have a short window or critical need that can't be met by a new build spare, check with Honeywell CRP. Available items can often be shipped in a day or two with no expedite fees.

Honeywell CRP Certification

As with all products supplied by Honeywell CRP the servers and stations must pass the Honeywell certification process to validate functionality and be sold with the '-RP' label that signifies a Honeywell Certified Recycled Part.

Warranty and Agency Approval

All Honeywell CRP material is covered by a pro-rated warranty for one year which is consistent with Honeywell new build factory spares. A two-year window of orders shows failure rates of less than 0.75% of the certified material shipped to sites.

In addition, any parts purchased from Honeywell CRP will not invalidate any agency approvals on the original system installed and will be fully supported by Honeywell.

Payment Options

All normally used payment options for your Honeywell spares are available to purchase CRP material. This includes Purchase Order, Credit Card, and a Parts Replacement contract entitlement.

How to Order

The servers and stations are available to order through your normal Honeywell spare parts channels. This includes ability to order through Honeywell's online store at www.honeywellprocess.com where the store is available.
