Web Order Services: Manage Customer Orders on the Move

Ensure optimal accessibility and connectivity on the go, and operate your business faster, simpler and more efficiently with Web Order Services.

Web Order Services
Honeywell’s Web Order Services are part of the Honeywell OptiVision® Suite, an Order-to-Cash solution for the Paper, Pulp & Flat Sheet industry. Web Order Services enhance the functionality of OptiVision software to get Order Status, Call Off, Re-print Document, Reporting and Order Entry functionalities on the Internet for customer sales representatives and mill customers.

Benefits
Through a unique set of applications, Web Order Services enable executives who are on the move to manage customer order and delivery information on the internet. It benefits customer sales representatives by enabling them to log customer orders and initiate further processing in OptiVision. It also provides access to a mill’s customers and their consignees, allowing them to track and review the status of their existing orders and make changes accordingly.

Key Features
Web Order Services run on a web-browser in the client device and is seamlessly integrated with OptiVision. It is available as an add-on web application. Web Order Services include three main modules:

- **User Services** – Includes common utilities like user registration, forgot/change password, update profile, and the administration screens to approve, activate or deactivate the registered user.
- **Web Order Entry** – Allows the user to create/enter an order from the web, modify/confirm existing orders from the web, and submit them to the OptiVision system for further processing.
- **Web Order Status** – Enables customers, consignees and sales representatives of the mill to search and review the status of existing orders.

Web Order Entry screen
Web Order Services runs on mobile devices such as iphone/iPad and is seamlessly integrated with OptiVision.
Types of User
Depending upon which type of user is logged in; information is presented in Web Order Services that is pertinent only for that user. Users include:

- Customers of customer – These users can enter order requests for only those customers assigned to him/her.
- Consignees of customer – These can only see those orders and their items for which the consignee is designated as the ship-to party.
- Sales representatives – These users can enter order requests for only those customers assigned to him/her.
- Administrator – The administrator can approve, activate or deactivate the registered user. Once the user is approved, the administrator assigns the appropriate permissions for the user as well as the entities like customer, consignee and grade spec.

Other Functionalities
Extra features of Web Order Services include the following:

- Price inquiry – Customer sales representatives and customers can view pricing information based on their privileges.
- View customer stock – Users can view the stock in warehouses assigned to a customer(s).
- View free stock – View unassigned stock in the warehouse.
- Call-off management with truck loading efficiency and reports – Allows customer/consignee to directly view stock available (their orders or warehouse stock) and accordingly plan shipments and delivery dates.
- Access to order acknowledgement, load manifest information, bill-of-lading, invoices, credit/debit memos.
- E-mail order status – Get the status of the order via e-mails.
- View/print order documents – At any point in time, get access to order documents.
- View/print order reports – Generate and view order reports on demand.
- View/print production reports – Generate and view production reports on demand.
- Administrator supported user management – Allows security and privileges to be assigned.

How to Start Web Order Services
The Web Order Services application is easy to start up. Simply follow these four steps:

- Register in the system by completing the User Registration form for a particular type of user.
- Obtain user approval from the mill administrator.
- The administrator will set up the entities like customer, consignee, grade spec etc.
- Log in with your user name to create, search and review the orders.

Support Services
This product comes with worldwide, premium support services through our Benefits Guardianship Program (BGP). BGP is designed to help our customers improve and extend the usage of their software applications and the benefits they deliver, ultimately maintaining and safeguarding their software investment.
