

Compliance Manager

Enabling a Safe, Compliant Working Environment

Honeywell Compliance Manager is a cloud-based subscription offering that provides detailed visibility into the readiness of industrial workers to perform their jobs safely, productively and confidently in compliance with Safety Policies.

Industrial companies today face numerous challenges related to the safety of employees and contractors working at their sites. Are these people qualified to work safely on site? Many companies don't have adequate visibility into the safety compliance of a worker or their personal protective equipment (PPE) for a specific job, task or facility zone. Nor do they have easy access to the data they need to effectively manage worker safety. The data that would otherwise provide this insight certification and training records, and personal protective equipment (PPE) criteria – is often lost in a sea of paper records, spreadsheets, databases and offline tools that require substantial effort to access and keep updated. The result? Safety staff spend more time in their offices managing records instead of in the field, where they are lost valuable. And there is a real risk of non-compliance that could lead to lost work hours, safety incidents, fines from regulatory authorities or reputational damage.

Through secure, cloud-based management of safety training and PPE assets, and real-time access to complete compliance information, Compliance Manager reduces the administrative burden of HSE teams and site managers while allowing them to lower safety and security risk, minimize downtime and reduce operational cost and complexity.

Compliance Manager transforms the capabilities of a company's safety function by integrating the management of training, PPE assets and worker compliance onto a single, cloud-based subscription application that can be securely accessed by multiple stakeholders via a desktop or mobile device. This provides a real-time record of compliance, helping them reduce administration tasks and risk.

FEATURES & BENEFITS

- Instill organizational and site confidence in worker safety compliance.
- Real time visibility of worker safety compliance across the organization including contractors' workforces.
- Reduces time & efforts on HSE administrative tasks of record keeping and training management.
- Efficient PPE asset management.
- Reduces PPE and safety equipment inspection time with Mobile app & RFID & Barcode scanning capabilities
- Ensures timely inspection of PPE equipment.
- Tracks high value PPE assignments.
- Integrates with Experion Industrial Security platform to enforce compliance and restricting non-compliant workers access to site/area.
- Efficient training management.
- Allocates and tracks training and certification compliance.
- Improves compliance through regular email alerts and team compliance reports for managers.
- Allows contractors to securely update their worker compliance data.
- Self Service administration
- Fast deployment with no CAPEX requirement and lower operating cost compared to onsite systems.

Compliance Manager also integrates with Honeywell Experion Industrial Security access control systems to ensure workers can only enter sites or zones they're qualified to work in based on their compliance status.

With its holistic approach to safety and compliance, and range of capabilities that exploit Honeywell's industrial safety heritage and know-how, Compliance Manager offers compelling value to users, helping them reduce the risk of incidents and penalties by ensuring the safety compliance of employees and on-site contractors.

Specifications

SYSTEM COMPATIBILITY

Browsers Supported	Internet Explorer, Google Chrome, Safari
Browser Versions	Internet Explorer 11 and above Google Chrome V 44.0.2403.155 and above, Safari version 9.0 and above
Tablet Type	8 inch plus screens
Tablet, Smartphone OS Version	Android 4.3, iOS 9 and above
Attachment Max size – Image	5MB
Attachment Max size - others	10MB

RFID AND BARCODE SCANNING

Scanners	HID keyboard emulation enabled scanner (USB/Bluetooth) with UHF RFID and 2D Barcode
RFID Tags	Class I Gen 2 Passive RFID Tags
Barcodes	1D and 2D Barcodes
RFID Multi Scanning	Yes

SECURITY

Application Security Compliance	OWASP Top 10 risks tested
Password Encryption	SHA256 Hashing Algorithm
Secure Data Transfer Protocols	HTTPS, SFTP

HOSTING INFRASTRUCTURE

DATA Center Compliance	SAS 70 Type II (or) SSAE 16
Instance	Multitenant with logical data separation
Data backup	Daily

Plant & Personnel Safety Solutions

Honeywell Plant and Personal Safety Solutions is a comprehensive portfolio of technologies and services designed to help users reduce the risk of incidents and respond more quickly and effectively should one occur, thanks to the provision of safety-related data insight. From risk assessments and fire and gas systems to intrusion detection and cyber security, Honeywell integrated solutions are field proven to ensure safe, secure operations.

Compliance Manager Onboarding Services

Honeywell also offer optional onboarding services to get you started with Compliance Manager. The remote service delivered by our expert team covers basic training, configurations and bulk data upload using templates, the service scope can be customized to your requirements and enables you to gain maximum benefits from the features and functionalities of Compliance Manager.
