

# The Midstream Experts

Let Honeywell streamline every part of your supply chain.

There's plenty of change happening in the energy business: global demand is on the rise, prices are constantly fluctuating, and fuel sources are shifting. With so many variables, those who manage the midstream market know that achieving efficiency and agility is vital at every link in the supply chain. With more than 100 years of experience, Honeywell offers complete midstream solutions that deliver reliability and value in the midst of change.

## 2. Transport Expertise

With more than 100,000 miles of completed pipeline projects, Honeywell is the oil and gas (O&G) transport expert. We equip pipelines to function as agile and connected highways, providing real-time visibility and control for safety, operations, metering, maintenance, and security.

### Our portfolio includes:

- High-performance control room design and operation
- Real-time monitoring to detect and prevent leaks, corrosion, and tampering

## 1. Processing Station Control

An efficient and integrated supply chain strategy starts upstream. The complete control solutions offered by Honeywell are designed to maximize production capacity, predict maintenance needs, and optimize operations in real time – all while surpassing compliance standards.

### Our portfolio includes:

- Real-time optimization that stabilizes and increases production
- Complete control, both locally and remotely

## 3. Skids and Modular Flexibility

The ability to customize operational functions to fit your environment opens up serious cost savings. And with fully connected skids and modular stations by Honeywell, remote management and instrumentation provide your staff with the same flexibility.

### Our portfolio includes:

- Both pre-built and custom skids
- Solutions for metering, batching and blending, loading and unloading, and other skid functions

## 4. Terminal Management Solutions

Whether you're storing or distributing product, Honeywell streamlines terminal operations, providing a complete solution that unites functions of inventory, instrumentation, metering, safety, security, and more into an integrated management system.

### Our portfolio includes:

- Integrated Experion PKS® and Terminal Manager systems
- Targeted solutions to improve blending, loading, and precise metering and measurement

## Why Honeywell?

**Systematic efficiencies**, that can reduce the project schedule by 10–20% and save on maintenance costs by 1–4%.

**Unmatched experience**, celebrating more than 125 years of innovation.

**Global presence**, with 11,000 installations in more than 125 countries.

**Financially stable partner**, ranked in the Fortune 100.

**Unmatched technical skills**, with the knowledge and support of thousands of world-class engineers.

Thriving in today's energy industry requires transforming changes and challenges into opportunities to improve operations and deliver more to your customers. When you partner with Honeywell, your entire supply chain is backed by a holistic approach and a comprehensive portfolio of solutions.

**What we really deliver is confidence in the future of your business.**
