provide additional value**

Prices are for typical DaVinci or MXProLine legacy QCS system.

Total Platform Migration price will vary based on system configuration and QCS version.

*Special pricing through incentive campaign

VIRTUALIZED QCS: PATH TO EFFICIENT OPERATIONS

Honeywell QCS systems are purposely built for the virtualization. Virtual QCS Platform Provides:

Improved Platform Reliability
Enhanced Hardware, OS & Software Compatibility
Simplified Upgrades & Patching
Protecting Data, IP and Investments

Low cost Virtualization Options available

Reference Virtual Design

Optimized for the process control industry

Factory Configuration

Standardized design and hassle-free project execution

Tested for Performance

With Honeywell Experion and Advanced Solution applications

Comprehensive Support

For all layers of the hardware & software stack

Protect Your Investments with HON Virtual Platform

LATEST SOFTWARE ENHANCEMENTS

Improved HMI, Alarm Management,
Diagnostics & Analysis

Browser Based Operator Displays

Access from any browser based device

Advanced MD and CD Multivariable
Control Packages

High machine performance, reduced
grade/recipe transition time & losses

Enhanced QCS-DCS Integration

Wide range of release interoperability

Extended History

Better decision support capabilities

AFFORDABLE, STEPWISE APPROACH TO MODERNIZE

Honeywell can help you plan your technology roadmap and stay current with the latest solutions to maximize production quality, efficiency, and yield

Latest QCS software on fully supported platform protects your operation from unplanned outages

QCS 4.0 Ready Platform, a SaaS cloud offering for real time optimization

Enables affordable lifecycle support to keep your QCS current at lowest TCO (Total Cost of Ownership)

QCS Automation Plan included with software upgrade provides roadmap to address obsolescence in QCS scanners, sensors, actuators, etc.

Bridge the increasing skills and knowledge gap in your rapidly changing workforce with advanced controls and automation

Make Your QCS Platform Ready for the Future
