Webinar Date:
April 12, 2017

Duration:
47 minutes

As the analytics platform for IIoT by Honeywell, the Uniformance® Suite provides powerful data analytics capabilities to enable users to capture the data they need, visualize trends, collaborate with others, predict and prevent equipment failures, and act to make informed business decisions.

Uniformance Insight makes it easy for you to visualize process conditions and investigate events from any web browser. Built on an intuitive platform using thin-client software, there are no downloads or installations required.

Watch this 60-minute webinar to learn how Uniformance Insight:

- Correlates traditional historian tags with KPIs, asset health and other application data – all in one tool
- Enables easy collaboration with others
- Allows users to log in using any web browser on their network to share trends, dashboards and more via a link
- Easy drag/drop trending helps users find the root cause of issues faster
