Symphonite™ CDP Serving the LNG Market
Discover how Symphonite™ CDP helps you drive better business decisions for your LNG operations

On Demand WEBINAR

Recording Available:

- **Webinar Date**: June 15, 2017
- **Duration**: 56 minutes
- **Size**: 400MB

The tightening of environmental norms and a need to give cities clean air is pushing the world to set its infrastructure to produce, transport and consume LNG. LNG is a cleaner and cost effective alternative to fuels such as coal and crude oil.

Given that LNG is available in abundance, its trade is set to surge. Symphonite CDP’s planning and visualization capabilities puts Honeywell in a good position to serve this segment. It has the ability to simulate and visualize multiple planning scenarios to take informed decisions collaboratively. In this webinar we will introduce you to CDP giving a flavor of its core functionalities and its application to LNG.

**Join our on demand webinar** and learn about key value drives of CDP for your LNG business.
