

Webinar On Demand

Discover USB threat protection, designed for industry: New Secure Media Exchange (SMX)

Recording Available:

Webinar Date
June 14, 2017

Duration
60 minutes

[Watch it Now](#)

Since discovery of the Stuxnet computer virus, industrial organizations have struggled with finding secure ways to use and monitor removable media. Unfortunately, many cyber security tools and strategies have failed to adapt to evolving operational demands. Removable media are critical to maintaining the availability and security of plant processes, and yet they introduce potential security risks.

Secure Media Exchange reduces cyber security risk and limits operational disruptions by monitoring, protecting, and logging use of removable media throughout industrial facilities.
