Managing Competency with a Transitioning Workforce

Jim Tramontana & Vikram, Saraf
2 October, 2018
Agenda

• History lesson and look at what it taught us?
• Competency Management in 2018
• Explore the profiles of the people
• Discuss the technology
• Look at the paths to competency
• Interactive demonstrations
• Q&A
• Hands-on
Honeywell’s History of Competency Management

• Conceived by Honeywell in 2015
• Customer driven initiative
• Key drivers
  - Tenure of workforce
  - Challenges attracting and retaining incoming generation
  - Do more with less
• Industry issues
  - Low commodity prices
  - Reduced budgets
  - Industry wide aged installed base
• Solutions….None!
So what’s changed?

• Commodity prices have rebounded
• The workforce is becoming polarized
• Industry suppliers have begun to realize there is a
• And…..

NOT MUCH ELSE!

• Except, we’re older more knowledgeable
So what have we learned?

Tenured workforce
- Walking trust of company knowledge
- Extracting knowledge is key
- Varied comfort levels with technology

Incoming workforce
- Multi-taskers with shorter attention spans
- Want continuous feedback
- Technology savvy
- Experiential Learners

Time to functional competence
- Traditional timetables won’t work
- Technology challenging both groups
- Need to leverage technology

Job execution & quality
- Cannot trade speed for quality
- Smart use of technology is key
- Information on-demand critical
What else have we learned?

- Key focus areas align with key drivers
  - Shorter learning curve
  - Increased skills retention
  - Higher productivity
  - Increased job compliance
  - Improved employee safety

- This is not an “event” it’s a paradigm shift
  - Customers expect Honeywell to have “skin in the game”
  - Outcome driven program is preferred

- One size does not fit all!
  - Program flexibility critical
  - Critical needs exist in different places for different companies
Let’s look at this incoming workforce

**Inventions of the 1990’s**
- GPS
- Linux
- Email
- Netflix
- WWW
- eCommerce
- Hybrid Vehicles
- USB Flash Drives
- Text & Instant Messaging
- Digital Video Recorder (DVR)
- Near Field Communication (NFR)

**Things the Incoming Gen Can’t Relate To**
- Dial-up
- Zip Drives
- Paper Maps
- Y2K Worries
- Film Cameras
- Tape Recorders
- Beepers/Pagers
- Answering Machines
- Giving a presentation using slides
- Carrying your Cell, Camera & MP3 player
- Explaining how to record & watch TV at the same time
What are they dealing with?

• What are 5 exabytes of Data?
  - The amount of data created between the dawn of civilization and 2003
  - The amount of data created every 2 days in 2010
  - The amount of data created 29 minutes by 2020

• Why is it happening?
  - Digital video production
  - Digital photos
  - 6.1 Billion Smartphone users by 2020
  - 50 Billion connected devices by 2020
  - 450 Billion business transactions/day by 2020

• IDC predicts a 42% CAGR for data through 2020

By 2020 we will generate 1.7 GB of new information every second for every person in the world!
Why does this matter?

• Because the inbound generation of workers are:
  - Digitally Focused
  - Adept at accessing information when and where needed
  - Tech savvy
  - Exceptional multi-taskers

• Because information accessibility:
  - Will have to be via the cloud
  - Will have to be on-demand
  - Will have to support rich content structured data

• Because you need to manage knowledge transfer
  - Formal education needs to be selective
  - Ongoing education needs to be impactful
  - Practice becomes essential
Competency Management 2018

• Profiles
  - Varies by job role
  - Leverages skills & experience
  - Not intimidating, Not boring

• Paths
  - Targeted at key positions
  - Consistent process for skills
  - Highly scalable

• Technology
  - Precisely targeted
  - Supports the skills process
  - Multi-use provides ongoing ROI
Profiles

• Generational gaps need to be bridged
  - Differences in learning styles
  - Wide array of comfort levels with technology
  - Working methods totally different

• Experienced…. Or not
  - Skill levels of employees vary widely
  - Give credit where credit’s due
  - Course correction where needed

• Capture and transfer knowledge
  - Unique or site specific
  - Need to avoid transferring “bad habits”
  - Implementation can’t be intimidating
Tenured Employees

• You need
  - Capture & leverage experience
  - Avoid intimidation
  - Increase productivity
  - Understand where skill gaps exist
  - Eliminate bad habits

• They need
  - Credit where credits due
  - Demonstrate capabilities
  - Appropriate Interventions
  - Tested to ensure capabilities
  - Qualified on the technology
Next Generation Employees

• You need
  - Shorter time to functional competence
  - Greater productivity
  - Engaged
  - Avoid bad habits

• They need
  - Training
  - Access to knowledge base
  - Practice newly acquired
  - Expertise on-demand
  - Demonstrate skills
  - Tested to ensure capabilities
  - Qualified on the technology
Mid-Career Employees

• You need
  - Enable excellence
  - Maximize productivity
  - Shared their expertise
  - Enhance capabilities

• They need
  - Skills enhancement
  - Access to knowledge base
  - Practice newly acquired
  - Expertise Enabled
  - Demonstrate skills
  - Tested to ensure capabilities
  - Qualified on the technology

- Accelerate Performance
- Enables Learn on Your Own
- Regulatory Compliance

- Management & Tracking
- Recommended Content
- Eliminates Oversight

Connects Employees to Mentors to Close Skill Gaps

Honeywell
THE POWER OF CONNECTED
Delivering Results

Why consider Honeywell Competency Management?

• Answers include
  - Knowledge management is not your core competency
  - Reduce risk
  - Improve performance
  - Faster time to functional competence

• For their outcomes
  - Increased efficiency
  - Organizational consistency
  - Improved regulatory compliance

• All Competency Management offerings are Multiyear, KPI driven, outcome based programs
Let’s have some fun!
SCENARIO: Expert Support for Remote Employees

Objective:
• Provide remote employees immediate access to expertise when needed
• Enable new employees to have support from tenured employees regardless of their location
• Provide SESP customers with over the shoulder support from GTAC (coming soon!)

Challenges:
• As people retire, there are fewer people with expert knowledge available to support remote sites
• Accessibility and cost to transport expert personnel to remote sites can be very high
• Improved support levels for SESP customers to increase the value they receive for their support dollars

Solution:
• Intelligent Wearable or other Android based device in the field
• Intrinsically safe or ruggedized model depending on customer requirements
• Expert On-Call app

Benefits:
• Reduction in operating expenses
• Faster time to proficiency
• Higher job compliance
• Faster meantime to repair
• Increased level of support for SESP customers
**SCENARIO: Capturing & Transferring Knowledge**

**Objective:**
- Enable customers to capture site or system specific knowledge from their tenured staff
- Provide a vehicle for new employees to receive information and procedures when needed on an on-demand basis
- Leverage technology across multiple applications within a competency program

**Challenges:**
- As people retire their knowledge and experience go with them
- Incoming generation of workers prefer to have a base level of training and access information as needed, when needed
- Average length of tenure for the new workers 3-5 years causing a change in instructional methods

**Solution:**
- Intelligent Wearable or other Android based device in the field
- Intrinsically safe or ruggedized model depending on customer requirements
- ProShot app

**Benefits:**
- Faster time to functional competence
- Higher job compliance
- Faster meantime to repair
- Retain site or system specific knowledge
- Instant access to complex procedures
Q & A
