

# PMIO Available to Support Your Needs

Honeywell's Certified Recycled Parts (CRP) program offers field replaceable spare parts for many product families from across the last 50 years of DCS and QCS equipment. This includes PMIO for your system migration and support needs.

## Service Note

The Honeywell CRP program is aimed at optimizing user's investments in Honeywell systems. It helps extend the life of existing systems with tested and certified recycled parts enabling a transition to current supported systems over a defined time. In the case of PMIO it helps provide continued support for your I/O as you migrate controllers whether to EHPM or C300.

### PMIO – For Today and Tomorrow

The xPM family has been the most popular controller Honeywell has provided and it was installed in more customer sites than any other. Chances are you had some generation of the xPM control system installed at your site. The constant across all those controllers has been the IO and associated FTAs that bring the inputs in from the field to the controller. Those same IO, often referred to as PMIO, have supported each generation of xPM controller and majority of them are supported by the C200 and C300 controllers as well.

This means whether you plan to continue running your current system configuration as you migrate to EHPM or if you are keeping your IO installed and migrating to C300 the existing PMIO you have installed will continue to be utilized and require field replaceable spares along the life of the system.

Honeywell CRP has a full line of IO and FTAs from the PMIO product family with continued inventory being evaluated and re-certified every month. Check with Honeywell CRP team to see if they have the parts you need for ongoing support of your PMIO.

### Honeywell CRP Certification

As with all products supplied by Honeywell CRP the servers and stations must pass the Honeywell certification process to validate functionality and be sold with the '-RP' label that signifies a Honeywell Certified Recycled Part.

### Warranty and Agency Approval

All Honeywell CRP material is covered by a pro-rated warranty for one year which is consistent with Honeywell new build factory spares. A two-year window of orders shows failure rates of less than 0.75% of the certified material shipped to sites.

In addition, any parts purchased from Honeywell CRP will not invalidate any agency approvals on the original system installed and will be fully supported by Honeywell.

### Payment Options

All normally used payment options for your Honeywell spares are available to purchase CRP material. This includes Purchase Order, Credit Card, and a Parts Replacement contract entitlement.

### How to Order

The servers and stations are available to order through your normal Honeywell spare parts channels. This includes ability to order through Honeywell's online store at [www.honeywellprocess.com](http://www.honeywellprocess.com) where the store is available.
