Safety Manager: Fundamentals - On-Line Modification Implementation

Course Overview
Course number: SM-4554
Course length: 2 days

This course provides the ability to perform On-Line Modifications (OLM). It demonstrates how to modify an application, upgrade to a newer software release, and even how to add or remove additional hardware on-line.

All the exercises are done using running Safety Manager™ systems.

Course Benefits

Course Delivery Options
- In-Center Instructor-Led Training
- On-Site Instructor-Led Training

Who Should Take This Course?
People who want to feel confident performing an OLM, modify an application and upgrade to a newer software release.

Prerequisite/Skill Requirements

Prerequisite Course(s)
- Completion of 4551 Course

Required Skills and/or Experience
- None

Desirable Skills and/or Experience
- None

Course Topics

The following topics are covered
