Operator Training & Simulation: Fundamentals - UniSim Experion Implementation

Course Overview
Course number: OTS-0006
Course length: 3 days

Want to understand the Experion Interface solution?
Want to acquire skills to maintain the Experion OTS?

- The UniSim® Experion Implementation course provides hands-on experience with the UniSim Operations Suite and Experion interface. The course uses a model that is designed to maximize the time participants spend learning the skills required to understand the Experion OTS and to acquire skills to maintain the Experion OTS. On completion of the training, participants become confident users of UniSim Operations for Experion system ready to deploy the acquired skills and knowledge in their own classroom.

Course Benefits
Sustain the value of your Experion USO OTS simulator

- Develop a conceptual understanding of the UniSim Operations and UniSim Design Training Simulator product for Experion DCS.
- Acquire the skills required to maintain and evolve the Experion USO OTS Simulator.

Prerequisite/Skill Requirements
Prerequisite Course(s)
- OTS-0001 and OTS-0002

Required Skills and/or Experience
- Working knowledge of Windows operating systems

Desirable Skills and/or Experience
- Plant, process, and controls knowledge

Course Topics
You will learn about

- Review of Experion USO OTS systems
- Understanding the fundamentals of UniSim control model
- Understanding the inter-model communications
- Experion CEE emulation and CEE interface
- Experion CEE Toolkit
- Experion SCADA emulation and SCADA interface
- Experion SCADA Toolkit

Course Delivery Options
- In-Center Instructor-Led Training
- On-Site Instructor-Led Training

Who Should Take This Course?
Simulator Professionals

- UniSim Operations Instructors and Trainers with an interest in model maintenance
- Engineers with maintenance responsibility

Additional Training
To increase your knowledge and skills, there are additional courses available from Automation College.
