

Profit Blending & Movement: Fundamentals - Profit Inventory Monitor (PIM) Maintenance

Course Overview

Course number: PBM-0002

Course length: 1 day

Maintaining your Offsite applications

This Profit® Inventory Monitor Maintenance Training course provides operations and maintenance engineer training information to Honeywell customers using Profit Inventory Monitor (PIM) in a combined lecture and lab environment.

Topics covered include:

- Application Functional Overview
- Application Setup and Monitoring
- Software Structure and Configuration
- Troubleshooting and Maintenance

Course Benefits

Maximize the benefits from your applications

- Improve speed of response to operational questions and issues raised
- Optimize configuration and site-specific tuning of the application. Many configuration and tuning changes can be done by on-site engineers
- Build front-line troubleshooting skills to handle local problems, and for optimal interactions with the Honeywell Application Support team
- Improve the ability to isolate system and configuration issues from application problems

Course Delivery Options

- In-Center Instructor-Led Training
- On-Site Instructor-Led Training

Who Should Take This Course?

Offsite system owners and troubleshooters

All customers charged with maintaining and troubleshooting their site's IM application:

- Offsite engineering staff
- Offsite maintenance technicians
- Offsite supervisors/managers

Prerequisite/Skill Requirements

Prerequisite Course(s)

- None

Required Skills and/or Experience

- Knowledge in working with Microsoft Server Operating System, Windows programming environment, Windows accounts and security
- Experience with Experion PKS:
 - Server (This can be obtained by taking the EXP-02 or EXP-02-AT or EXP-02-VT course)

Desirable Skills and/or Experience

- Knowledge of Microsoft SQL Server database administration
- Knowledge of site architecture and operations

Course Topics

Participants will learn how to...

- Operate the PIM software. The applications' operator interface uses HMI Web graphics
- Manage Tank Strapping Table and Alarm configurations, Tank Display configuration and Overview settings
- Provide first line support of offsite operations
- Develop troubleshooting and maintenance techniques for the site-specific application
- Make minor configuration changes to tune system and meet operational needs
- Provide a knowledgeable customer focal point for discussion of issues among management, operations and maintenance

Additional Training

To increase your knowledge and skills, there are additional courses available from Automation College.
