

Profit Blending & Movement: Fundamentals - Profit Movement Management – Movement Monitor (PMM-MM) Maintenance

Course Overview

Course number: PBM-0008-VILT

Course length: 3 days

This course provides in-depth knowledge relating to Profit® Movement Management - Movement Monitor (PMM-MM) concepts and functions. It includes hands-on workshops to provide practical experience in using and configuring PMM-MM.

***NOTE:** This course includes the complete curriculum covered in Profit Inventory Monitor Maintenance (PBM-0002-VILT). Students who enroll in the PMM course should not enroll in the PIM course as well.

Course Benefits

Maximize the benefits from your applications

- Improve speed of response to operational questions and issues raised
- Optimize configuration and site-specific tuning of your application. Many configuration and tuning changes can be done by on-site engineers
- Build front-line troubleshooting skills to handle local problems, and for optimal interactions with your Honeywell Application Support team
- Improve your ability to isolate system and configuration issues from application problems

Course Delivery Options

- [Virtual Instructor-Led Training](#) (VILT)
- IMPORTANT – Prior to registration, you must review/perform any required check(s) by visiting this link: [E-Learning Access Requirements](#)

Who Should Take This Course?

- Application Engineers
- System Engineers

Prerequisite/Skill Requirements

Prerequisite Course(s)

- None

Required Skills and/or Experience

- Experience PKS operation experience
- Experience with Experion PKS:
 - Server (This can be obtained by taking the EXP-02 course)
 - Controller (This can be obtained by taking the EXP-2001C3 course)

Desirable Skills and/or Experience

- Basic plant and process knowledge
- Basic control system knowledge
- Familiarity with Microsoft Windows environment
- Knowledge of Microsoft SQL Server database administration
- Knowledge of your site's Offsites architecture and operations

Course Topics

The following topics are covered:

- Overview and Introduction
- Product and Architecture Overview
- Profit Inventory Monitoring
- Order Setup
- Task Execution
- User Features, including Blending Interface
- RAE Browser
- Redundancy and Recovery
- Configuration Displays
- Configuration Studio
- Application Maintenance - Adding/modifying Equipment, Synchronization
- Alarm sets and Configuration
- Diagnostic Displays, Troubleshooting and Maintenance
- References and Resources

Additional Information

To increase your knowledge and skills, there are additional courses available from Automation College.
