Certification Overview

Certification test number: SM-4551-CT  
Certification test length: Up to 4 hours

The HPS Automation College Certification program provides a means for students to demonstrate that they have mastered the content of critical courses.

Based on specific employee roles, Honeywell Certified Associate (HCA) certification verifies student mastery of fundamental knowledge of the core product training content.

For Associate certification, the requirement is to successfully complete the training course and any pre-requisites for that course. Then, the student must successfully pass (at a level of 80% correct) a comprehensive examination.

The examination is proctored and closed-book. The examination is offered at Automation College facilities, and following on-site training. Students register for the examination as they would a course. They have up to four hours to complete the examination, but it will normally require no more than 90 minutes to complete. In the event they fail the first examination, a second can be taken within the next 30 days.

Certification Benefits

Honeywell Certified Associate certification program:
- Provides evidence to employers that employees did not merely attend a course, but gained specific knowledge
- Helps employers address regulatory and quality requirements involving employee performance
- Ensures complete understanding of HPS products by operators, maintenance technicians, administrators, and installation specialists, and so increase the optimum use of these products for efficiency and safety
- Allows the individual employee to validate that he or she has understood the breadth of course material

Who Should Take This Certification?

Safety Manager Customers
- New to Safety Manager system implementation
- Responsible for implementing and/or modifying an existing Safety Manager system
- Requiring broad familiarization with much of the Safety manager system's capabilities

Prerequisite/Skill Requirements

Prerequisite Course(s)
- SM-4551

Required Skills and/or Experience
- None

Desirable Skills and/or Experience
- Knowledge of process control, instrumentation, and a general electrical background

Additional Training

To increase your knowledge and skills, there are additional courses available from Automation College.
